Use a personal computer for OnVUE option

If you are taking an online proctored exam in an available country, we strongly recommend using a personal computer (not issued from your employer) and a wired, ethernet connection. The two most frequent causes of technical issues are testing on (1) a work computer and (2) an unreliable internet connection. Security settings from work computers may restrict the software. Unreliable internet connections (wireless network, VPN, mobile hotspot) may lead to being disconnected.
